

Correction: Comparative Evaluation of GenoType MTBDR*plus* Line Probe Assay with Solid Culture Method in Early Diagnosis of Multidrug Resistant Tuberculosis (MDR-TB) at a Tertiary Care Centre in India.

LED-Fluorescence Microscopy for Diagnosis of Pulmonary Tuberculosis under Programmatic Conditions in India.

Systematic review of the performance of rapid rifampicin resistance testing for drug-resistant tuberculosis.

Mutation in katG315 is, possibly, a good prognostic marker for treatment with second-line drugs in multi-drug resistant tuberculosis: A preliminary study.

Cost-effectiveness of routine diagnostic evaluation of pulmonary tuberculosis in a primary care unit in Brazil.

Cost-effectiveness of Xpert® MTB/RIF for diagnosing pulmonary tuberculosis in the United States

Validation of sputum smear results in the Electronic TB Register for the management of tuberculosis, South Africa.

First proficiency testing of second-line anti-tuberculosis drug susceptibility testing in 12 provinces of China.

Comparison of molecular and immunological methods for the rapid diagnosis of smear-negative tuberculosis.

Feasibility, accuracy, and clinical effect of point-of-care Xpert MTB/RIF testing for tuberculosis in primary-care settings in Africa: a multicentre, randomised, controlled trial
